The purpose of this study is to find out the factors that cause underage marriage and how to study Christian ethics towards underage marriage. The research method used in this study is a descriptive qualitative research method which was carried out at the GMIM Efrata Sion Tompas Baru Church.

Research data were collected through observation and interviews. The results showed that there were several factors that led to underage marriage, including the environment in which they lived, education from their parents and pregnancy out of wedlock. From these findings, it is recommended to all congregations about the importance of marriage so that there is no more underage marriage and to the Church in it the role of the Church in looking at the issue of underage marriage.

Keywords: Christian Ethics, Underage Marriage
